MAG60

The ez2clasp™ MAG50 and MAG60 are innovative clasps that combine high fashion with high security!

The patented design not only resists separation like no other magnetic clasp, but also can be removed with only one hand. The secret is in the wave construction and the super strong magnets. Designed with bracelets in mind, the MAG50 and MAG60 work great with neckchains, pearls and beads, too.

The ez2clasp is in stock and available NOW! Sold individually in Sterling Silver and 22K Vermeil.
