MAG5
EZ4U

MAG11
Mag-Lok™

Adding to our extensive line of magnetic clasps, R•Findings is pleased to introduce our own MAG5 EZ4U and the new MAG11 Mag-Lok™.

The MAG5 EZ4U is a smaller, lower profile design similar to the MAG50 and MAG60 ez2clasp™. The combination of unique wave design and extra-strong magnets help this clasp resist being pulled apart accidentally, yet it can be released with only one hand. The MAG5 is 6MM and available in sterling silver.

If you're looking for an attractive and value-priced magnetic clasp, the **MAG11 Mag-Lok™** is a great option. This 11MM clasp has a super-strong magnet and uses no glue in the assembly. They come a dozen per package in your choice of three colors: silver plate, gold plate and black plate.

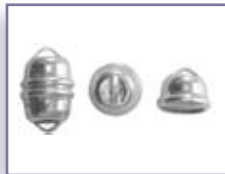

The MAG5 EZ4U, MAG11 and the other magnetic clasps pictured are in stock and available for immediate delivery. With 10 magnetic clasps to choose from you're sure to find what you need!

MAG6
